Mosina	Liudmila	WHO Euro
FitzSimons	David	Ex WHO

What is the focus of your organisation on viral hepatitis in the coming 5 years

- WHO: development of global strategy
- WHO EURO: implementation of the European Vaccine Action Plan for the Regional Hepatitis B Control Goal; preparing for a comprehensive regional integrated plan for prevention and control of viral hepatitis, including the setting of a regional goal and targets, in line with the global strategy
- Development of national hepatitis plans in every country, with targets and access to prevention and care for all patients (WHO, ELPA and other civil society organizations)
- Development of plans with all stakeholders and with budgets
- Strengthening networking and seek synergies
- ECDC: surveillance, monitoring, and development of tools and guidelines for prevention and control
- VHPB to provide a forum for exchange of information about mechanisms to reduce prices and models for existing price negotiations
- The role of antiviral agents in prevention

What do you expect from the countries

- Commitment to and monitoring implementation of the European Vaccine Action Plan and the hepatitis B goal
- Leadership of Member States in design and implementation of national plans
- Advocacy at supranational level
- Provision of national information and data, collaboration through networks
- Increase public health capacity for prevention and control of viral hepatitis, including surveillance
